ABSTRACT

The tables and graphs in this document provide a statistical portrait of Idaho State University (ISU). The first section presents student data for both the fall and spring semesters of 1997-1998, and include unduplicated headcount enrollment, full-time-equivalent enrollment, student credit hours, student age distribution, residence of students, student/faculty ratio, and mean American College Testing (ACT) composite scores for new, full-time academic freshmen. The next section presents data on degrees and certificates, including number of academic programs accredited, number of applied technology programs accredited, degrees and certificates available to ISU students, and degrees and certificates awarded by ISU during 1996-97. A third section provides faculty and staff data, including faculty salaries (mean nine-month), and average administrative salaries (12-month). Financial data tables include student fees and expenses (per semester), tuition and fees (average annual cost), financial aid granted (fiscal year (FY) 1997), higher education appropriations (FY 1998), ISU revenues for FY 1997, and ISU expenditures for FY 1997. Tables covering facilities provide data on: physical plant assets (end of FY 1997), replacement value for total facilities, square footage of total assignable area, total residents in ISU housing, library total volume count, academic classes held on campus each week, regular classes held in Idaho Falls each week, and regular academic class sections offered on-campus. STATISTICAL PORTRAIT
1997-1998

INTRODUCTION

This is the 22nd in a series of statistical portraits developed by the Office of Institutional Research. It has been designed to provide the faculty, administration, and other interested persons with a basic statistical portrait of the university. Some of the information provides a snapshot of the university at a particular point in time, while other data portrays trends over a period of time.

The information is divided into sections which emphasize students, programs, faculty and staff, finances, and physical facilities.

Several assumptions have gone into the preparation of this resource book. First and most importantly, there is a basic assumption that information about the status of the university is one of the most significant tools in effective educational decision making. Second, there is the assumption that the availability of information about the university in a centralized and relatively easy to use format will help improve the level of knowledge about the institution and will help assure that consistent information is provided to any general inquiries. Finally, the series of fact books can be utilized to provide trend data over many years for a wide variety of institutional characteristics. However, because we are constantly working to improve the usefulness of this document, changes have been and will continue to be made in the content and format, so all data may not be available over the entire series.

In this line, we do welcome suggestions from readers of the document about how we might make it more useful or more understandable. If there is information which does not appear in this portrait or if something could be presented in a more useful form, please contact the Office of Institutional Research. Our primary purpose is to be of assistance in making information accessible to its users. Any comments or suggestions that will enable us to do our job better will be given every consideration.

* Accreditation is required for licensure.

ACADEMIC PROGRAMS THAT MIGHT BE ACCREDITED:

Clinical Psychology: Accreditation from the American Psychological Association cannot be sought until the first group of doctoral students have graduated.

Public Administration: The resources (faculty, space, etc.) required to meet the guidelines of the American Society for Public Administration would be considerable and unwarranted since graduates have not encountered employment problems.

Public Heath: Will apply for accreditation after the requisite number of graduates finish the program.

Radiological Technology: Gave up programmatic accreditation since graduates are no longer required to graduate from a Joint Review Committee on Education in Radiologic Technology accredited program in order to be certified by the American Registry of Radiologic Technologists (ARRT).
